Experience

UI/UX Designer & Frontend Developer — NCRA-UAV Lab *Jun 2025 – Aug 2025*

- Owned the end-to-end design process for a real-time Ground Control System (GCS): user research, task-flow mapping, wireframes, and high-fidelity Figma prototypes.
- Built responsive React components for mission control, live telemetry dashboards, and operator alerts, prioritising clarity and usability under high-stakes operational conditions.

AI Application Developer — Boosend.ai (Freelance) *2025 – Present*

- Designed and shipped a React Native mobile app and marketing landing page for an AI-driven outreach platform, covering UX research, prototyping, and frontend implementation.
- Architected agentic AI messaging workflows across Instagram, WhatsApp, Telegram, and TikTok, integrating LLM-powered personalisation at scale.

AI Systems Researcher — Freelance *2025*

- Prototyped a real-time AI teaching avatar with multimodal interaction (speech, vision, NLP), designing the conversational UX and evaluating model integration strategies for scalable deployment.

Education

BS Computer Science *Expected 2026*
FAST-NUCES, Islamabad Dean's List: Fall 2024, Fall 2025 | Federal Government Merit Scholar | Silver medal Holder

F.Sc — ICS (95%) *2022*
Fazaia Inter College

Skills

UI/UX: User Research, Wireframing, Interaction Design, User Flows, Usability Testing, Responsive & Mobile-First Design

AI / ML: LLMs, Agentic Pipelines, LangGraph, MCP, RAG, SBERT, NLP, Machine Learning, Deep Learning, Multimodal AI

Frontend: React, Next.js, React Native, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Python, PostgreSQL (pgvector), MongoDB, SQL, REST APIs

Projects

Agentic AI Film Montage Pipeline *LangGraph · MCP · LLMs · Multimodal AI*
Designed and built an end-to-end agentic pipeline that transforms story prompts into complete audiovisual film montages. The system autonomously generates screenplays, creates character designs, synthesises images, and produces audio/video output with versioned editing for iterative creative control. Showcases orchestration of multi-agent LLM systems for complex creative workflows.

Research Paper Recommendation System (Final Year Project) *RAG · SBERT · Next.js · FastAPI · pgvector*
Designed and built a full-stack semantic research discovery platform. Led UX design of the interface including search experience, paper cards, and trend visualisations; engineered the RAG + SBERT backend over large-scale arXiv datasets for personalised recommendations, automated summarisation, and research trend detection.

Book Reading Platform *React · Node.js · MongoDB · REST API*
Built a full-stack MERN web application with user authentication, reading progress tracking, bookmarking, and a review-driven recommendation engine, delivering an end-to-end consumer product experience.

ML Autonomous Racing Controller *Python · Reinforcement Learning · TORCS*
Trained a machine learning agent to drive autonomously in TORCS simulation, implementing real-time decision making, trajectory optimisation, and adaptive control with measurable lap-time improvements.

Certifications & Awards

- **AWS Academy Cloud Foundations** — Amazon Web Services
- **Federal Government Merit Scholarship** (2022–2026) — FAST-NUCES
- **Dean's List** — Fall 2024, Fall 2025
